Zone di tutela relative all'idrografia principale lett. g dell'art. 41 L.R.11/2004

Art. 23

Zone di tutela relative ai corsi d'acqua lett. b dell'art. 41 L.R.11/2004

Art. 23

The main map displays a detailed cadastral plan of the area around Bosaro, Italy. The River Po (Fiume Po) flows through the landscape. The map is overlaid with various colored and patterned zones defined in the legend: a large green area (Art. 20) indicating 'Area idonea', a yellow area (Art. 20) indicating 'Area idonea a condizione', and a red area (Art. 20) indicating 'Area non idonea'. A blue dashed line with an 'E' symbol (Art. 21) marks an 'Area esondabile o a pericolo ristagno idrico'. Two blue hatched areas (Art. 23) represent 'Zone di tutela' relative to the main hydrography and water courses. The map also shows various localities such as GRENANS POLESINE, BORSA, ARQUA POLESINE, and BOSARO, along with roads and agricultural fields.
